

# Vitamin C Buffered Powder

*Non-acidic powdered vitamin C*

Vitamin C Buffered Powder is a non-acidic form of vitamin C, designed for high dosing and vitamin C “flushing.” By adding the minerals calcium, magnesium and potassium, the natural acidity of ascorbic acid (vitamin C) is reduced by the alkalizing actions of these minerals.

## **BENEFITS OF BUFFERED VITAMIN C**

**Alkalizing Effects** – The standard American diet is highly acid forming, which may adversely affect health. Supplemental calcium, magnesium and potassium may help reduce systemic acidity, thus supporting overall wellness.

**Bone Health** – The inclusion of calcium, magnesium and potassium support healthy bone mineralization.

**Antioxidant** – Vitamin C, in meaningful doses, is an effective antioxidant that works to scavenge damaging free radicals within the body.

**Immune Health** – High dose vitamin C can support a healthy immune system.

**Skin Health** – Vitamin C supports collagen formation for healthy skin, as well as other connective tissue, such as bones, tendons, ligaments and blood vessels.

**Adrenal Health** – Vitamin C supports healthy adrenal function, as it is required for the synthesis of adrenal hormones and neurotransmitters.

## **BENEFITS**

- Reduces whole body acidity
- Gentle on the stomach
- Scavenges free radicals
- Supports bone health
- Supports immunity and adrenal function
- Helps form healthy skin

## **HIGHLIGHTS**

**Better Tolerated** – Due to its natural acidity, high doses of vitamin C may result in an upset stomach and possible loose stools. This buffered Vitamin C is gentler on the gastrointestinal system, allowing for higher dosing without unpleasant side-effects.

**Better Absorption** – Added minerals help reduce the speed at which vitamin C travels through the gastrointestinal system, allowing more time for adequate absorption.

**Better Delivery** – Vitamin C Buffered Powder can be easily added to any beverage and eliminates the need for multiple pills.

**Better Ingredients** – Made with non-GMO ingredients.

## **RECOMMENDED USE**

As a dietary supplement, take 3 grams (approx. one teaspoon) per day, or as directed by your health care practitioner.
