OTHER INGREDIENTS: Cellulose, silica.

SUGGESTED USE: As a dietary supplement, take 1-4 capsules three times per day or as directed by your healthcare professional.

PHYTO IMMUNE

VITAMINS & STANDARDIZED HERBAL EXTRACTS TO SUPPORT PROPER IMMUNE SYSTEM FUNCTION DURING TIMES OF STRESS

- Supports a healthy immune system
- Adjunctive support
- Immune system adaptogen: acts as a tonic to improve immune resistance to infection

Consider Phyto Immune for your patients to help maintain normal upper respiratory health. Phyto Immune is designed to act quickly to help shorten the duration of sickness. Each ingredient in Phyto Immune is safe and nontoxic when used as directed. We encourage you to prescribe Phyto Immune for short periods of time (up to two weeks) to help maintain normality. We recommend pulsing Phyto Immune with a two week on and one week off routine. This will encourage the strongest response from your patient's immune system and avoid the development of immune resistance.

ECHINACEA ANGUSTIFOLIA is probably one of the most heavily documented botanicals for immune enhancement. It is commonly recommended for optimal support during cold and flu season. Echinacea stimulates the alternate complement pathway and macrophage activity. Echinacea is not recommended for HIV positive patients (short term use is accepted) or autoimmune disease patients.

ANDROGRAPHIS PANICULATA AND PRIVOT FRUIT (*LIGUSTICUM LUCIDUM*) are used traditionally in Asia for their health promoting properties and immune system support. Like Echinacea, they act to boost immune system.

AMLA (*EMBLICA OFFICINALIS*) has anti-inflammatory and antioxidant properties. The immune system uses oxidative processes to kill invading pathogens. Amla's antioxidant properties help protect healthy tissue from damage during immune system activation.

GOLDENSEAL stimulates macrophages and inhibits the growth of pathogenic bacteria. Goldenseal's traditional use was among Native Americans for a wide variety of ailments.

ASTRAGALUS MEMBRANACEUS is an oriental tonic and health promoter. Its reported use is to help maintain normal immune system function. It also enhances circulation and has been of reported benefit in supporting the circulatory system.

SCHISANDRA CHINENSIS has been used for centuries in China and Tibet. It is considered an adaptogen, increasing the body's resistance to stress and helping to regulate and normalize the functions of the body. *Schisandra chinensis* increases the body's endurance. It acts as an antioxidant, anti-bacterial, and an anti-toxin.

L-LYSINE has been reported to reduce viral replication by modulating the production of arginine. L-Lysine provides nutritional support for the body's natural defense against infections.

VITAMIN A is essential for the proper function of the immune system. It supports the maintenance and repair of skin and mucous membranes.

PRECAUTIONS: *Warning! Excessive vitamin A may be toxic and may increase the risk of birth defects. Pregnant women and women who may become pregnant should not exceed 5,000 IU total per day of preformed vitamin A (retinyl palmitate).*
